

CAPABILITY STATEMENT

Exceptional Quality. Proven Precision. Trusted Partnership.

COMPANY OVERVIEW

Cryer Limited Partnership dba Specialty Machine, is an AS9100- and ISO 9001-certified small business specializing in precision CNC machining, welding, and assembly. With extensive expertise in producing complex, tight-tolerance components, Specialty Machine supports defense, aerospace, semiconductor, energy, and industrial markets. A responsive and collaborative approach ensures every project is delivered with uncompromising quality and dependable on-time performance.

Built on decades of precision and integrity, we deliver solutions with exceptional quality and performance that advance progress in the world's most critical industries. Through reliability and trusted partnerships, we help our customers achieve excellence in every endeavor.

CAPABILITIES

Specialty Machine provides advanced manufacturing solutions through precision CNC machining, complex part fabrication, and certified welding under AWS CWI oversight. Capabilities extend from rapid prototyping to short- and long-run production, supported by assembly and kitting services for sub-components. Every project undergoes rigorous inspection and metrology processes capable of verifying tolerances to 0.0001 inch, ensuring consistent accuracy and reliability. By combining technical expertise with proven processes, Specialty Machine delivers high-quality components for mission-critical programs across defense, aerospace, energy, semiconductor, and industrial markets.

CORE COMPETENCIES

- Precision CNC Machining
- Rapid Prototyping
- Short & Long Run Production
- Complex Part Fabrication
- Certified Welding Services
- Assembly & Kitting
- Rigorous Inspection & Metrology
- Design for Manufacturing Support

DIFFERENTIATORS

Specialty Machine is an ITAR-registered, ISO 9001 and AS9100-certified manufacturer recognized for precision, reliability, and responsiveness. Our vertically integrated facilities unite multi-axis CNC machining, EDM, cylindrical grinding, honing, welding, and clean-room assembly under one roof, providing complete process control from raw material through final inspection. With greater machine capacity and flexibility than most small-business competitors, we consistently achieve over 99.9% quality and over 97% on-time delivery. Our long-tenured workforce and no-excuses culture ensure mission-critical reliability and reduced customer risk.

PAST PERFORMANCE

Tier 1 Defense Contractor

Customer requested we supply ceramic spacers.

- Contract ID: M190XXXXXX-X-X (FCI) - Contract Information Available Upon Request.
- Start Date: 07/02/25
- End Date: 09/03/25
- Value: \$5,721

Tier 2 Defense Contractor

Fabricated large steel weldment for high pressure application requiring welding and x-ray testing with supporting 6061 aluminum parts.

- Contract ID: XXXX (FCI) - Contract Information Available Upon Request.
- Start Date: 04/24/25
- End Date: 07/21/25
- Value: \$100,542

Tier 2 Defense Contractor

Fabricated steel handling rings nearly 40" in diameter.

- Contract ID: XXXX (FCI) - Contract Information Available Upon Request.
- Start Date: 03/14/25
- End Date: 06/05/25
- Value: \$43,417
